

Board Practices and Performance Assessment Five Step Implementation Guide

1 Your organization makes a commitment to conduct a board practices and performance assessment through governWell™.

2 We provide copy for emails you will send to your board inviting them to complete the assessment. The emails include a link to an online survey.

3 We send email updates to you while the survey is underway so you know who has responded and who hasn't. When it's time to send a reminder email (which we've included in your email copy), you'll know who to send the reminders to and who to skip.

4 We develop a comprehensive report summarizing your assessment findings as well as our recommendations. The report is emailed to you.

5 Your board reviews the assessment report together and discusses next steps to further elevate your board's performance. You may choose to connect with governWell™ for a follow-up phone call if desired.
